

Artificial Intelligence

Artificial intelligence, or AI, is a field of computer science concerned with creating systems that can perform tasks associated with human intelligence.

AI systems can perform learning, reasoning, planning, perception, language understanding, and decision making.

Machine learning is an important approach to artificial intelligence. Modern AI includes machine learning, deep learning, natural language processing, computer vision, robotics, and generative AI.

AI applications include virtual assistants, fraud detection, medical diagnosis, recommendation systems, cybersecurity monitoring, and robotics.

Responsible AI considers fairness, privacy, security, transparency, accountability, and bias.
